

PARTHIBAN ARUCHAMY, PMP®

+91-8270688237 | parthiban89@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

PMP®-certified Program/Project Manager with 14+ years of international experience managing complex engineering and transformation projects across APAC, Europe, and the Middle East. Background spans subsea/offshore connectors and ADAS/Camera Monitoring System (CMS)/smart-glass R&D program leadership, with a track record of managing multi-million-dollar project portfolios, driving supplier cost reductions, and building RAID driven governance frameworks that hold up under regulatory and customer scrutiny. Comfortable operating at both the technical design table and the executive stakeholder table. Foundational knowledge in AWS AI & Cloud practitioner, Python, Deep Learning.

CORE COMPETENCIES

Program & Project Management | Product Lifecycle & Road mapping
Stakeholder Engagement & Governance | Risk, Issue & Compliance Management
Cross-functional Team Leadership | Delivery Planning & Execution
Sales Support & Budget Tracking | KPI Tracking & Performance Reporting
Process Improvement & Operational Excellence | Digital / AI-enabled Exposure

CERTIFICATIONS

Project Management Professional (PMP®) – Project Management Institute

TECHNICAL EXPERTISE

- **PM & Collaboration Tools:** Jira, Confluence, Monday.com, Primavera P6, MS Project
- **Engineering & Design Tools:** PTC Creo, Windchill, CATIA V5, SolidWorks, Autodesk Inventor, AutoCAD
- **Standards & Compliance:** API 5A, API 6A, API 16A, API 16C, ASME, IATF 16949, ISO Standards
- **Methods & Frameworks:** PMP, Agile/Scrum, Lean Manufacturing, 5S, Value Stream Mapping

PROFESSIONAL EXPERIENCE

Design Lead – Project Engineering (APAC/Regional)

Gauzy – Singapore | August 2018 – May 2026 (Remote engagement from India via contractor model 2020–May 2026)

- Led end-to-end delivery of 8+ concurrent engineering and R&D projects for ADAS-CMS, Collision detection system, Smart glass, Aircraft & Automotive cabin windows across APAC and the Middle East, managing project portfolios valued at approximately USD 3+ million annually
- Managed cross-functional teams of 15+ members across Engineering, Manufacturing, and Supply Chain, maintaining project delivery performance above 95% on-time completion
- Led cross-functional phase-gated design reviews and risk assessment workshops, driving innovation, quality improvements, and regulatory compliance throughout the CMS product development lifecycle
- Partnered with global stakeholders across France HQ, regional business units, and client organisations to define requirements, align delivery roadmaps, and govern program execution across the full lifecycle
- Restructured supplier sourcing across Asia, cutting unit costs by 22% while holding or improving delivery lead times
- Implemented Monday.com as the central project tracking platform across concurrent regional programs, replacing ad hoc spreadsheet reporting with live KPI dashboards visible to France HQ and regional leads
- Used AI tools (Claude, Microsoft Copilot) to speed up drafting of technical presentations and customer-facing materials, cutting prep time by 15–20% during peak proposal periods
- Contributed feasibility analysis, cost estimation, and technical solutioning during RFQ stages, helping secure contracts with leading Asia OEM bus builders including Yutong, Volvo, and Golden Dragon

- Supported product and solution development initiatives by contributing to FMEA/DFMEA feasibility analysis, cost estimation, and technical solutioning during RFQ and execution phases
- Delivered consistent on-site execution support and customer engagement across international locations, maintaining strong client relationships throughout project delivery (~30% travel)

Design / Subsea Support Engineer

Oil States Industries (Asia) Pte Ltd – Singapore | June 2013 – August 2018

Design & Subsea Engineering

- Developed and delivered subsea equipment (connectors, risers, hubs) with strong focus on DFM, standardisation, and lifecycle support in compliance with API and industry standards
- Performed design calculations, pressure testing oversight, and reverse engineering of subsea equipment (Valves, Mandrel, Flex Joint, Wellhead equipment's) to support refurbishment and reuse
- Improved engineering documentation workflows, reducing preparation time by 30% per project and enhancing compliance control

Project Engineering & Cost estimation

- Managed end-to-end project engineering delivery for onshore and subsea projects, ensuring alignment with contractual scope, schedule, cost, and quality standards
- Led project planning, scheduling, and execution using structured PM methodologies, integrating risk identification, mitigation, and performance tracking
- Served as Project Engineer on connector casing projects for Middle East customers (including ADNOC, KOC, Total Qatar), contributing to an annual portfolio valued at USD 10M+, managing project planning, stakeholder coordination, budget tracking, procurement activities, risk mitigation, and on-time delivery in accordance with contractual and technical requirements
- Coordinated cross-functional and global teams (Singapore, Aberdeen) to ensure seamless execution, stakeholder alignment, resource allocation and delivery governance
- Developed and maintained WBS, Kick off meeting arrangements, project schedules, KPIs, and reporting dashboards to provide visibility and support data-driven decision-making
- Performed risk assessments and implemented mitigation strategies to minimize delays and cost overruns while maintaining compliance requirements
- Built detailed cost estimation models covering materials, labour, and logistics — supporting competitive bid development and informing product decision-making
- Engaged with certification bodies and key stakeholders to ensure regulatory compliance and smooth approvals across the project lifecycle

Quality & Systems Leadership

- Led enterprise-wide implementation of MasterControl Quality Management System across 100+ users, improving process standardisation, compliance visibility, document control effectiveness, and operational governance
- Certified Internal Auditor for ISO 9001, ISO 14001, and OHSAS 18001

Trainee Engineer

McKinnon India Pvt. Ltd – India | May 2010 – June 2011

EDUCATION

Master of Science (M.Sc.), Mechanical Engineering

Nanyang Technological University, Singapore (August 2011 – July 2012)

Bachelor of Engineering (B.E.), Mechanical Engineering

Anna University, India (August 2006 – May 2010) | First Class Honours with Distinction
